Parmeshwar Rathod, Backend Engineer

Namaste,

I'm Parmeshwar

I belong to the Banjara nomadic community, i am the first from my whole family and village to complete college education. Being a first generation learner, with no education background at home, and while working since childhood to support my expenses, despite of this obstacles, I managed to score distinction/first class in every exam from class 10th. I mention this to assure you of my determination and hard/smart work. Whatever I have achieved is through a lot of struggle and sacrifice, due to which I don't take any opportunity for granted.

Currently working as a Software Developer since 2 years building full stack web and mobile apps while still learning my way up through

Employment History
